I would want to do something with architecture and restoring historic buildings/sites!

**What are some of your goals for your EC position?**

My goal is to provide increased documentation so that the EC and committees can have the foundation to take on more projects in the future. I have been working to create a more centralized location for work done by the EC and committees. I hope to help the EC to create position guides and a policy manual to pass onto the province for future use. I'm excited to really get started with the process now that we will soon have officially made it half way, gone through spring province assembly, and better understand the roles of our positions!

My goal this year is to increase professional development within our province by working with the province planning committee and the executive committee. I plan to have at least one professional event at each province assembly from here on out. Another goal I have is to organize and plan the first ever regent retreat occurring this summer. I also am working with the province planning committee to write a proposal for reframing meeting structure to only having one business meeting yearly and having a workshop focused meeting the other semester. Overall I want our province to find more meaning in province assemblies and not only develop ourselves as brothers, but develop ourselves as professionals.

In addition, I would like to create a periodic report of any NPP EC initiatives and updates we have from the province to ensure all brothers are staying up-to-date. Lastly, my final initiative that I am finalizing for this upcoming Province Assembly is creating a NPP Scholarship for collegiate brothers. I am extremely excited for this opportunity and I look forward to serving you all this year!
